JERRY STOLLER

Stoller Founder, Chairman

Jerry Stoller has more than 50 years of production agriculture experience and plant nutrition expertise around the world working with virtually all crops.

Philosophy

In the early 1990s, Stoller began researching the genetic expression of plants.

In that time, this research approach was revolutionary in managing healthy crops through hormonal balance and micronutrients along the crop cycle.

Through this process, maximum genetic expression can be achieved, resulting in healthier plants that are able to withstand the effects of greater stress under various conditions.

Jerry's passion for encouraging healthy crops around the world led to international growth for his company.

1970

Opens headquarters in
Houston, Texas, United States.

Focus is on **chelated micronutrients.**

The process of developing chelated
micronutrients begins for **70 crops**
worldwide.

1977

Stoller Brazil is the first
Stoller Group
subsidiary outside the
United States.

1979

Stoller introduces
an innovative **flowable**
sulfur product making
sulfur applications
easier for growers.

1988

Nitro-Plus
This innovative
product is
introduced into
the market.

1990

Stimulate
A product composed of
three growth hormones
that revolutionized the
industry.

1992

Stoller USA begins
experimenting and
researching **the genetic**
expression of plants.

1993

The Stoller Group hosts
the first **US Ag**
Conference in Chicago,
bringing together a small
number of growers and
consultants to address
common issues.

1995

The **US Ag Conference** moves to
Houston, Texas. By 2007 it
hosts over
300 visitors from 20 countries.

1996

The Stoller Group
patented the **KEYLATE**
line of micronutrients.

1998

Ernst & Young presents **Jerry Stoller** the **Entrepreneur of the Year** award.

2001

The theory of "**The Therapy of Vegetative Health**" is developed based on the use of growth cofactors keeping **plants healthy and vigorous** through stressful periods.

2003

The results of the **Texas Agricultural Experiment Station** showed that plants treated with **Stoller Technology** naturally **improved** their **resistance to insects**.

Stoller continues to refine its model of hormone activity and nutrient interaction.

2004

Independent research demonstrates tomato plants treated with Stoller's **Root Feed** produced **30-60% higher yields**.

2005

The Stoller Group researchers release data showing that **Bio-Forge** increases the survival rate and yield potential of **stressed crops**.

2006

Stoller foundation
Opens its doors.

CORPORATE SOCIAL RESPONSABILITY.

2008

Stoller USA is recipient of the **Frost & Sullivan Green Excellence Award**.

2010

The Stoller Group patented **Plant Hormonal Cycle**

2017

In Brazil, **Stoller** opens the **largest biological fertilizer manufacturer** in Latin America.

THE STOLLER FOUNDATION

In response to God's blessing, Jerry decided to invest in the Lord's Kingdom by creating the Stoller Foundation in 2006.

Founded by Jerry Stoller and the Stoller Group, the Stoller Foundation is a foundation that incubates and accelerates non-profits that are focused on evangelism and volunteerism.

Stoller *foundation*

MISSION

It's members support Christ-centered ministries that mobilize volunteers to serve others and share the Gospel of Jesus Christ.

VISION

Our vision is to empower non-profits to restore lives and communities through the power of the Gospel.

We provide the
best solutions

As growers face challenges, the Stoller Group will provide the motivation, and expertise to find new solutions.

We aim at providing growers with innovative solutions for every crop as well as technology for every need.

Stoller Technology takes on a new direction focusing on health and optimal performance rather than reacting to stress damage.

The key to implement such an ambitious initiative, is that Stoller Group recognizes the need to intimately understand the plant hormone balance, how it relates to the growth stages of crops and the impact of hormonal activity on plants.

VISION

To be the agricultural science leader by empowering people to improve lives.

MISSION

We are a customer-oriented agricultural company that creates exceptional value for our stakeholders through innovation and knowledge.

"I created Stoller as a company that could help **farmers** do a better job at **growing crops**. It has always been my ambition to do something **in agriculture** that was different than what people normally did. **As I said, it was the desire to do something different.**"

JERRY STOLLER
