INSTRUCTIONS FOR USE:

HoldPlus is a liquid fertiliser composed of chelated cobalt salts and molybdenum. Due to the formulation, these two micronutrients are active enzymatic cofactors reducing the synthesis of ethylene and reactive oxygen species (ROS). The **Stoller Technology** present in the formulation of the product provides adequate nutrition to intervene naturally in the physiological processes of plants.

Observations:

Carefully read the instructions on the label before using the product.
The product is compatible with most liquid fertilisers however; if mixing is desired, it is advisable to consult your local distributor or representative in advance.
The product is designed for foliar application. To be used only where there is a recognised need. Do not exceed the application rate. It will be the user's responsibility to increase or decrease them according to the crop's characteristics, always following the advice of a specialist technician. In any case, we recommend making a small-scale test before using the product.

RECOMMENDED STORAGE CONDITIONS:

Store according to local legislation. Observe indications on the label. Store the containers between 0 and 35 ° C, in a dry and well-ventilated place, far from sources of heat and direct solar light. Keep far away from ignition points. Keep away from oxidising agents and from highly acidic or alkaline materials. Do not smoke. Prevent the entry of non-authorised persons. Once the containers are open, they must be carefully closed and placed vertically to prevent spills. Please also refer to the information provided in the Material Safety Data Sheet (MSDS).
