

MIXTURE OF TRACE ELEMENTS IN SUSPENSION WITH ALGAE EXTRACTS FOR FOLIAR APPLICATION**USE : FOLIAR BIOSTIMULANT BASED ON TRACE ELEMENTS AND SEAWEED EXTRACTS****GUARANTEED CONTENTS:**

Water-soluble cobalt (Co)	2.0% w/w
of which Cobalt (Co) chelated by EDTA	1.8% w/w
Water-soluble molybdenum (Mo)	2.0% w/w
Water-soluble Zinc (Zn)	0.5% w/w
of which Zinc (Zn) chelated by EDTA	0.4% w/w
Mannitol	0.29% w/w

Species based seaweed extract: *Ascophyllum nodosum* and *Ecklonia maxima*.

pH range in which a good stability of the chelated fraction is guaranteed: pH between 2 and 11.

DOSES AND DIRECTIONS FOR USE:

Carefully read the instructions on the label before using the product.

The product is designed for foliar applications, according to the doses and conditions of use recommended in the table below. It will be the user's responsibility to increase or decrease them according to the crop's characteristics, always following the advice of a specialist technician. It is recommended to perform any compatibility test before using the product. Agitate well before use.

CONDITIONS FOR USE:

CONDITIONS FOR USE						
Crop						Growth Stage
Leafy vegetables	✓	0.50%	1.5 - 2 L/ha	2 - 5	300 - 400	During period of maximum abiotic stress. Applications 7 to 14 days apart.
Tubers	✓	0.50%	1.5 - 2 L/ha	2 - 5	300 - 400	During period of maximum abiotic stress. Applications 7 to 14 days apart.
Bulbs	✓	0.50%	1.5 - 2 L/ha	2 - 5	300 - 400	During period of maximum abiotic stress. Applications 7 to 14 days apart.

 Foliar application  Optimal dosage  Use dose per application(s)  Number of application(s) per year  Treatment volume (L) (Minimum-Maximum)

Storage:

Store the product according to the corresponding local legislation.

Store the containers in a dry and well-ventilated place, far from sources of heat and direct solar light avoiding extreme temperatures below 0 °C or above 35 °C.

Keep away from any flame. Keep away from any oxidising agents and from highly acidic or alkaline materials. Do not smoke. Once the containers are open, they must be carefully closed and placed vertically to prevent spills.

MODE OF ACTION:

Hold is a foliar Biostimulant that allows minimizing the adverse effects caused by stress conditions in herbaceous crops. The **Stoller Technology** present in the manufacturing process reactivates plants after stress situations, stimulating the photosynthesis process and the generation of energy in the form of photoassimilates. **Hold** stimulates plant nutrition processes by activating plant's stress-relievers.

Fertiliser used in organic agriculture according to EU regulation no. 2018/848.

USE RECOMMENDATIONS:**Precautions for use:**

If the recommended technical measures are observed, no individual respiratory protection equipment is necessary. Use of work gloves marked "CE" Category I, according to CEN standards EN 374-1, EN 374-2, EN 374-3 and EN 420. Use of face shield marked "CE" Category II, eye protector against splashing liquid according to CEN EN 165, EN 166, EN 167 and EN 168 standards. Use of protective clothing marked "CE" Category II, according to CEN EN 340 standard.

Use of work footwear marked "CE" Category II, according to CEN EN ISO 13287 and EN 20347 standards. In the application area, smoking, eating, and drinking must be prohibited.

Follow legislation on occupational health and safety. Never use pressure to empty the containers. They are not pressure-resistant containers. Keep the product in containers made of a material identical to the original.

In case of accidental spillage or release:

Prevent the contamination of drains, surface or subterranean waters, and the ground.

Contain and collect spillage with inert absorbent material (earth, sand, vermiculite, Kieselguhr...) and clean the area immediately with a suitable decontaminant.

Deposit waste in closed and suitable containers for disposal, in compliance with local and national regulations.

Compatibility:

The product is compatible with most plant nutrition products. It is recommended to be tank mixed always in the following order: 1. Water 2. **Hold** 3. Other chemical components (plant nutrition products, Agrochemicals). However, if mixing is desired, prior consultation with your local distributor or representative is recommended.

Immediate application of any product mixture is recommended, avoiding leaving the mixtures at rest for long periods of time. It is recommended to perform any compatibility test with other products before mixing with **Hold** and to perform small scale crop trials before using the product.

Keep away from oxidising agents and from highly alkaline or acidic materials in order to prevent exothermic reactions.

Caution:

STOLLER EUROPE, S.L.U. provides recommendations for use based on its experience. A large number of uncontrollable factors (preparation of the mixture, climatology, type of application, etc.) can be involved. Therefore, the user will be responsible for any damage that may occur.

Read the label carefully before use

Classification according to regulation (EU) No 1272/2008 (CLP):

GHS07
WARNING
CAS : 15137-09-4
Contains: cobalt disodium
ethylenediaminetetraacetate

CLASSIFICATION OF THE PRODUCT:

H317. May cause an allergic skin reaction.

Precautionary Statement:

P102. Keep out of reach of children.

P261. Avoid breathing dust/fume/gas/mist/vapours/spray.

P270. Do not eat, drink or smoke when using this product.

P280. Wear protective gloves/protective clothing/eye

protection/face protection/hearing protection/...

P302+P352. IF ON SKIN: Wash with plenty of water/...

P321. Specific treatment (see the label).

P333+P313. If skin irritation or rash occurs: Get medical advice/attention.

P362+P364. Take off contaminated clothing and wash it before reuse.

P501. Dispose of contents/container to a waste bin.

NET MASS: 6.2 kg

To be used only where there is recognised need.
Do not exceed the appropriate application rates.

NET VOLUME: 5 L
