

Stoller solution to prevent nutrient deficiencies and develop the maximum potential of your crops*

FoliMix is a liquid fertiliser that provides Magnesium, Iron and other essential micronutrients to optimise the crop's agronomic and productive potential of the crop.

The micronutrients contained in **FoliMix** are complexed with gluconic acid, which enhances their stability and facilitates their penetration and translocation inside the plant tissues.

- ✓ Does not contain nitrates or any nitrogen source.
- ✓ Helps to reduce possible negative effects caused by micronutrient deficiencies.
- ✓ Increases the yield of those crops in which it is present by providing essential elements for the correct development of plants.

Stoller Formulation Technology

Nutrients	Mg	Fe	Mn	B	Zn	Cu	Mo
Content	2%	2%	1%	0.2%	0.16%	0.1%	0.08%
Physiological Properties	Photosynthesis (chlorophyll) Motion from sugars to the roots grain	Photosynthesis Respiration	Photosynthesis Regulates levels of auxins Transfers energetic	Movement of sugars Cells wall elasticity Absorption K and P	Formation of Auxin Photosynthesis ATP synthesis	Increases photosynthesis and respiration	Assimilation of Nitrogen

FoliMix can be applied by **foliar** application at a **dose of 1-3 L/ha** and by **drip irrigation at 3-5 L/ha**. From **2 to 6 applications every 7-15 days**.

Do not mix with other fertilizers containing phosphates.

Density (kg/L): 1.23 ± 0.02

pH: 3.5 - 5.5

Conductivity (ms): 30 - 40

*Thanks to the **Stoller Formulation Technology**, we provide adequate nutrition which naturally intervenes in the physiological processes of the plants.
