

## Stoller Solution for crop establishment and early crop development\*

**HarvestPlus** provides a broad combination of complexed macro and micronutrients that together with Stoller Formulation Technology enhance crop establishment during the early stages. **HarvestPlus** supports root development and growth as well as being a source of energy and essential nutrients at key phenological stages such as sprouting, flowering and fruiting. Its application helps crops to prevent and correct nutritional deficiencies allowing them to reach a higher productive potential.

**HarvestPlus** can be applied to all crops in both hydroponic and localized irrigation systems at a dose of 3-5 L/ha with a recommended frequency of 2-6 applications per crop cycle.

- ✓ High phosphorus content and **root growth activators**.
- ✓ **Decreased effects of trace element deficiency**.
- ✓ **Higher crop yields**.
- ✓ **Orderly growth** of the plant from the beginning of cultivation.

### Stoller's Formulation Technology

Nutrient	P	N (Ammoniacal)	K	N (Ureic)	B
Content	18%	3.5%	3%	1.5%	0.1%
Nutrients	Zn	Fe	Mn	Cu	Mo
Content	0.3%	0.3%	0.3%	0.1%	0.05%

Density: 1.28 ± 0.02 kg/L

pH: 4.5 - 6.5

Conductivity: 90 - 100

\*Thanks to Stoller Formulation Technology, we provide appropriate nutrition that naturally intervenes in the physiological processes of plants.
